

ITECH3209 – Project 2

Sprint 4 – Deliverables (Individual Report)

Student Name: - Hetkumar Umeshbhai Patel

Student ID: - 30391427

This basically comprises the individual progress and contribution up until sprint 4 development as part of this specific individual document. I am the product's operational manager and web tester, which means that I have attached some screenshots to this document in accordance with my dual jobs.

As an operational manager and web tester, I am doing the duties of a front-end developer and web tester for the fourth building sprint. However, I utilize validator.w3 and testing to test the codes, and it was through these tools that I learned that the coding was tested.

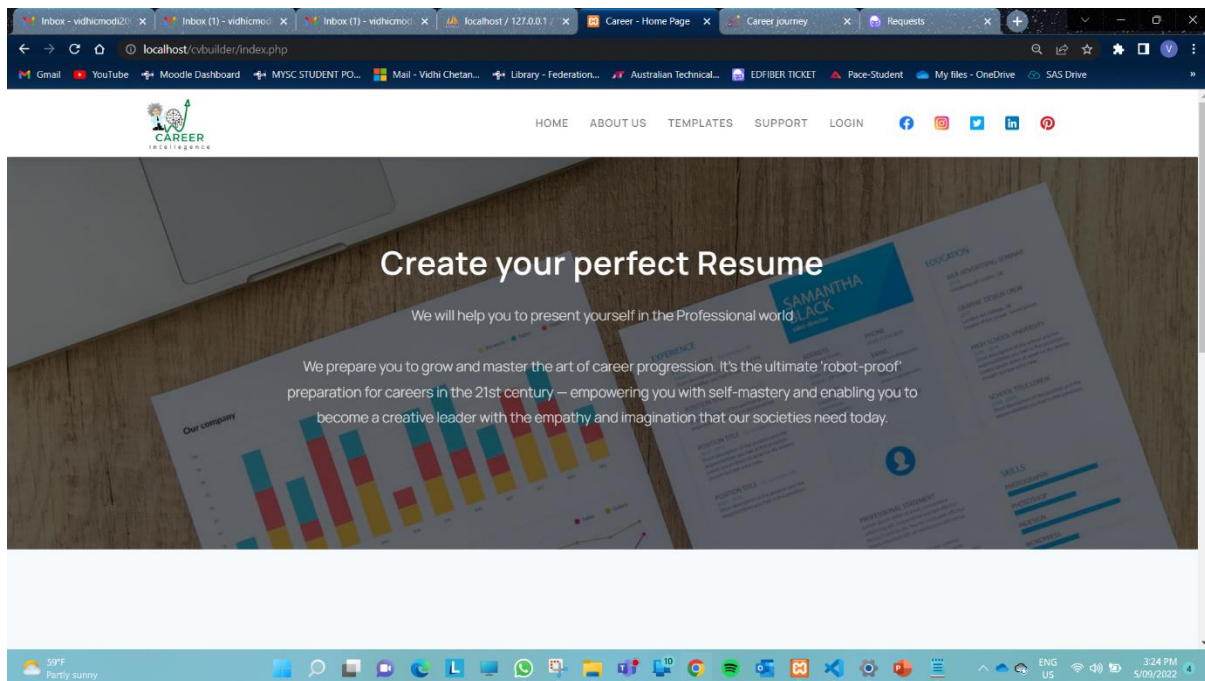

The back-end developer assisted me in fixing a few problems I found when I tested the about and support us pages. As a web tester, I've also examined documents like the homepage and profile page. After making website adjustments, I tried each of these scripts.

After our discussion, the client requested we make some adjustments to the website's interface. As a result, I altered the website's main page's interface. Furthermore, the front-end coding of admin login is done by me.

As an operational manager, I assigned my team the documentation for sprint 4 and we all worked on it in accordance with the distributed work. Additionally, I had a written contribution statement and a sprint 4 progress report.

Home Page

The screenshot of the home page of the career intelligence website, and the screenshot of the coding and the testing of the updated home page are attached below.

```

<main>
  <div class="section tmp-banner d-flex justify-content-center align-items-center">
    <div class="container">
      <div class="py-5 text-white text-center">
        <h1 class="display-2 mb-5 tmp-banner-title">Create your perfect Resume</h1>

Check

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

- Warning** Consider adding a `lang` attribute to the `html` start tag to declare the language of this document.
From line 1, column 1 to line 1, column 28
`<include('layout/header.php')></include>`
For further guidance, consult [Declaring the overall language of a page](#) and [Choosing language tags](#).
If the HTML checker has misidentified the language of this document, please [file an issue report](#) or [send e-mail to report the problem](#).
- Error** Non-space characters found without seeing a doctype first. Expected `<!DOCTYPE html>`.
From line 1, column 1 to line 1, column 28
`<include('layout/header.php')></include>`
- Error** Element `head` is missing a required instance of child element `title`.
From line 1, column 1 to line 1, column 28
`<include('layout/header.php')></include>`
